Hazard sta	tements			
H290		rrosive to metals.		
H314	Causes se	vere skin burns and eye damage	<u>.</u>	
H335	May cause	e respiratory irritation.		
Precaution	ary statements			
P102	Keep out o	of reach of children.		
P234	Keep only	in original packaging.		
P260	Do not bre	eathe dust/fume/gas/mist/vapou	rs/spray.	
P280	Wear prote	ective gloves/protective clothing	/eye protection/face protection.	
P305+P351		5: Rinse cautiously with water fo to do. Continue rinsing.	r several minutes. Remove conta	ict lenses, if preser
P405	Store lock			
P501	Dispose of	contents/container in accordan	ce with local and national regulat	ions.

# Following inhalation

# Safety Data Sheet according to Regulation (EC) No. 1907/2006 (REACH)

# Trade name :

Revision date : Print date :

# Lithofin CEMENT-AWAY

16.11.2023 11.12.2023 Version (Revision) :

5.1.7 (5.1.6)

Remove casualty to fresh air and keep warm and at rest. If breathing is irregular or stopped, administer artificial respiration. In case of respiratory tract irritation, consult a physician.

# In case of skin contact

After contact with skin, wash immediately with plenty of water and soap. Immediately remove any contaminated clothing, shoes or stockings. Do not wash with: Cleaning agent, acidic Cleaning agent, alkaline Solvents/Thinner

## After eye contact

In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Protect uninjured eye.

## **Following ingestion**

Call a physician immediately. Keep at rest. If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Do NOT induce vomiting.

# Self-protection of the first aider

First aider: Pay attention to self-protection!

**4.2 Most important symptoms and effects, both acute and delayed** No information available.

## 4.3 Indication of any immediate medical attention and special treatment needed Notes for the doctor

Treat symptomatically. Special treatment

First Aid, decontamination, treatment of symptoms.

# **SECTION 5: Firefighting measures**

# 5.1 Extinguishing media

Suitable extinguishing media Water spray jet ABC-powder Foam

# Unsuitable extinguishing media

Full water jet Strong water jet

# 5.2 Special hazards arising from the substance or mixture Hazardous combustion products

Carbon monoxide Carbon dioxide (CO2) Hydrogen chloride (HCl)

# 5.3 Advice for firefighters

Use suitable breathing apparatus.

# Special protective equipment for firefighters

Wear a self-contained breathing apparatus and chemical protective clothing.

# 5.4 Additional information

Use water spray jet to protect personnel and to cool endangered containers. Do not allow run-off from fire-fighting to enter drains or water courses. Do not inhale explosion and combustion gases. The product itself does not burn. Co-ordinate fire-fighting measures to the fire surroundings.

# **SECTION 6: Accidental release measures**

# 6.1 Personal precautions, protective equipment and emergency procedures

Wear personal protection equipment (refer to section 8). Provide adequate ventilation. Remove persons to safety.

# 6.2 Environmental precautions

Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains.

# 6.3 Methods and material for containment and cleaning up

# For cleaning up

Suitable material for taking up: Universal binder

Clean contaminated articles and floor according to the environmental legislation. Retain contaminated washing water and dispose it. Dispose of waste according to applicable legislation.

# Lithofin CEMENT-AWAY

16.11.2023 11.12.2023 Version (Revision) :

5.1.7 (5.1.6)

## Hand protection

Suitable gloves type : Gloves with long cuffs

**Suitable material** : Data apply to the main component. Butyl caoutchouc, 0,5mm, >8h; FKM (fluoro rubber), 0,7mm, >8h;

### Required properties : EN ISO 374

**Recommended glove articles** : Manufacturer KCL GmbH/Eichenzell-Germany; Ansell/Yarra City-Australia Or comparable articles from other companies.

Additional hand protection measures : Check leak tightness/impermeability prior to use.

**Remark** : Breakthrough times and swelling properties of the material must be taken into consideration. The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Barrier creams are not substitutes for body protection.

# Body protection

Protective clothing.

Suitable protective clothing : Chemical protection clothing Chemical resistant safety shoes

Required properties : acid-resistant.

Protective clothing. : EN 13034 EN 14605

Chemical resistant safety shoes : EN ISO 20345

 $\ensuremath{\textbf{Remark}}$  : Barrier creams are not substitutes for body protection.

## **Respiratory protection**

Usually no personal respirative protection necessary. Respiratory protection necessary at: insufficient ventilation aerosol or mist formation. high concentrations spray application

# Suitable respiratory protection apparatus

Full-/half-/quarter-face masks (EN 136/140) Combination filtering device (EN 14387) ABEK-P1 (EN14387) Remark

Use only respiratory protection equipment with CE-symbol including four digit test number. Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190).

### **General information**

Minimum standard for preventive measures while handling with working materials are specified in the TRGS 500. When using do not eat, drink, smoke, sniff. Avoid contact with skin, eyes and clothes. Remove contaminated, saturated clothing immediately. Wash contaminated clothing prior to re-use. Wash hands before breaks and after work. Apply skin care products after work. Do not breathe gas/fumes/vapour/spray.

## **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

Appearance :	Liquid					
Colour :	light yellow					
Odour :	stinging					
Safety charact	eristics					
Melting point/free	zing point :	( 1013 hPa )	<	-13	°C	
Initial boiling point range :	t and boiling	(1013 hPa)	approx.	106	°C

# 9.2 Other information

None

# **SECTION 10: Stability and reactivity**

## 10.1 Reactivity

No specific test data related to reactivity available for this product or its ingredients.

**10.2 Chemical stability** 

The product is chemically stable under recommended conditions of storage, use and temperature.

## **10.3 Possibility of hazardous reactions**

No hazardous reaction when handled and stored according to provisions.

# 10.4 Conditions to avoid

Stable under recommended storage and handling conditions.

# **10.5** Incompatible materials

The product develops hydrogen in an aqueous solution in contact with metals.

# 10.6 Hazardous decomposition products

Does not decompose when used for intended uses.

# **SECTION 11: Toxicological information**

# 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

## **Acute toxicity**

Based on available data, the classification criteria are not met.

Acute oral toxicity	
Parameter :	LC50 (HYDROGEN CHLORIDE ; CAS No. : 7647-01-0)
Exposure route :	Oral
Species :	Rabbit
Effective dose :	900 mg/kg
Parameter :	LD50 (Formic acid ; CAS No. : 64-18-6 )
Exposure route :	Oral
Species :	Rat
Effective dose :	730 mg/kg
Method :	OECD 401
Acute inhalation toxicity	
Parameter :	LC50 (HYDROGEN CHLORIDE ; CAS No. : 7647-01-0)
Exposure route :	Inhalation
Species :	Rat
Effective dose :	3124 ppm
Parameter :	LC50 (Formic acid ; CAS No. : 64-18-6 )
Exposure route :	Inhalation

Acute (short-term) toxicity to algae and cyanobacteria

Parameter :EC50 ( Formic acid ; CAS No. : 64-18-6 )Species :DaphniaEffective dose :356 mg/lExposure time :48 hMethod :OECD 202

# Sewage treatment plant

Observe local regulations concerning effluent treatment. Before discharge into sewage plants the product normally needs to be neutralised.

# 12.2 Persistence and degradability

There are no data available on the preparation/mixture itself.

## Biodegradation

The surfactants contained in this mixture comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

## 12.3 Bioaccumulative potential

# 16.7 Additional information

None

The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.
