

Lithofin MN Care-Seal for natural and concrete stone

Description

A special product from the LITHOFIN range for marble, natural stone and cast stone (MN). Solvent-free, water-soluble dispersion based on resistant acrylates and hard waxes.

Features

Lithofin MN Care-Seal forms a self-shining protective film on the surface. This refreshes the colour and improves the appearance of the surface. At the same time, the surface becomes more resistant.

Technical data:

Appearance: liquid, white

Smell: fresh, non-specific

Density: approx. 1.0 g/cm³

pH value: approx. 9 (concentrate)

Flash point: n.a.

Scope of application

To refresh the shine and protect polished marble and granite coverings. To increase the gloss of matt and dull floor surfaces. For the silky gloss initial treatment of rough, sawn or flamed surfaces that are rough-cut and fractured. For occasional indoor use only.

Processing

The surfaces and equipment to be treated must be clean and dry.

For the initial treatment, dilute Lithofin MN Care-Seal with water approx. 1:5 and apply evenly with a clean cloth, sponge or lambskin mop and let dry for 30 to 40 minutes.

The resulting shine can be enhanced by polishing (polishing) by machine or by hand. Absorbent or matt surfaces can be treated undiluted.

To refresh the effect, add Lithofin MN Care-Seal to the mopping water from time to time, approx. 1 cup/ 10 litres of mopping water.

Please note: Do not walk on the surface during drying. In the case of heavily frequented areas, the treatment must be repeated as required. From time to time, cleaning with Lithofin MN Power-Clean is necessary, with which the product can be removed again. We recommend testing in an inconspicuous area beforehand.

Coverage: approx. 20 m²/litre as a sealant up to approx. 200 m²/litre when applied in mopping water.

Further care

For ongoing maintenance, the following is used: Lithofin MN Wash & Clean or Lithofin EASY-CARE, which is always added to the mopping water.

Storage

Closed and cool but frost-free.

Can be stored for up to approx. 3 years.

Environmental protection

The surfactants are biodegradable in accordance with Regulation (EC) No. 648/2004 (detergents regulation).

Disposal: The container is made of environmentally friendly polyethylene (PE) and is recyclable. Rinsed containers can be disposed of and recycled via the recyclable material collection system (see note on label).

For information on labelling, transport and disposal, please refer to the safety data sheet.

Packaging

a) 1 litre bottle with child-proof cap (10 per box)

b) 5 litre canister (2 per box)

Please note that the environmental and safety information applies to the (concentrated) product in delivery form. If dilution is appropriate for the application, the classification may change.

This information can and should only provide non-binding advice.

The use of the products must be adapted to the local conditions and the surfaces to be treated. If there is no experience and in all cases of doubt, the product should be tried out in an inconspicuous place beforehand. (EN11.25/9.25)
