

Lithofin MN Wash & Clean

Description

A special product from the LITHOFIN range for marble, natural stone and cast stone (MN). Mildly alkaline cleansing care concentrate based on high-quality natural soaps and special cleaning and care components.

Properties

Highly active ingredients remove the dirt particles from the surface and keep them suspended during the cleaning process, making them easy to absorb. The remaining wafer-thin care film is wax-free and does not build up layers. However, it ensures that the appearance of the pavement is improved during ongoing use, and the surface becomes more beautiful and stronger in colour and structure. Lithofin MN Wash & Clean leaves a pleasant smell.

Note: On surfaces impregnated with Lithofin MN STAINSTOP, Lithofin MN Wash & Clean strengthens and supports the effectiveness of the protection.

Specifications:

Density: approx. 1.0 g/cm³

pH value: approx. 11 (concentrate), > 8 (diluted)

Appearance: viscous, opalescent

Smell: fresh, perfumed

Solubility in water: good, complete

Scope

For the regular maintenance of all marble and natural stone coverings on floors and walls, for tables, window sills, kitchen worktops, etc.

Substrates: All natural stones such as Carrara, travertine, Solnhofen natural stone slabs, Jura marble, porphyry, Serizzo, sandstone and cast stone. The surfaces can be polished, sanded or rough, impregnated, sealed or untreated.

Processing

Always add Lithofin MN Wash & Clean to the mopping water. One shot (approx. 20 ml) per bucket of lukewarm water. For first-time use, use a little more for porous or heavily soiled surfaces. Do not wipe the remaining moisture film with clean water.

Note: For heavier soiling, we recommend Lithofin MN Power-Clean.

Storage

Closed and cool. Not above 25°C;
Can be stored for up to approx. 5 years.

Productiveness

Lithofin MN Wash & Clean is a high-yield concentrate and therefore very economical to use. For large areas that are cleaned daily with a scrubber drier, a monthly requirement of approx. 3 litres / 100 m² (approx. 0.1 litres / 100 m² per cleaning cycle) can be expected.

Recommendation

Natural stone floors should be mopped with a damp cloth regularly. The following care method is particularly effective for polished marble: For wiping, use 3 to 4 times Lithofin MN Wash & Clean and then 1 time Lithofin MN Care-Sheen.

Environmental protection

The surfactants are biodegradable in accordance with Regulation (EC) No. 648/2004 (detergents regulation).

Disposal: The container is made of environmentally friendly polyethylene (PE) and is recyclable. Rinsed containers can be disposed of via the recyclable material collection system (see note on label).

For information on labelling, transport and disposal, please refer to the safety data sheet.

Packaging

- a) 1 liter bottle with child-resistant cap (10 pcs. in a box)
- b) 5 liter canister (2 pcs. in a box)
- c) 10 liter canister (single)

Please note that the environmental and safety information applies to the (concentrated) product in delivery form. If dilution is appropriate for the application, the classification may change. This information can and should only provide non-binding advice. The use of the products must be adapted to the local conditions and the surfaces to be treated. If there is no experience and in all cases of doubt, the product should be tried out in an inconspicuous place beforehand. (EN11.25/9.25)
