

## Lithofin EASY-CARE Cleans and Maintains in one Operation

### Description

Lithofin EASY-CARE is a universally usable, mild soap cleaner with a balanced combination of natural and synthetic cleaning agents, supplemented by effective care components. This formulation, which has been tried and tested for decades, guarantees thorough cleaning, combined with lasting care – with the least effort.

#### Technical Data:

Density: 1.0 g/cm<sup>3</sup>

pH value: approx. 11 (concentrate)

Appearance: viscous, opalescent

Smell: perfumed, fresh

Solubility in water: complete.

### Properties

Highly active cleaning agents remove dirt from the surface so that it can be easily absorbed. The liquid film that remains on the surface during wiping leaves care components when drying, which accumulate in the surface with regular use. This makes the surface increasingly beautiful, i.e. the natural colour structure is emphasised and gives the surface a colourful and well-groomed appearance. At the same time, the surface becomes noticeably less sensitive to stains and is easier to maintain overall.

Lithofin EASY-CARE is mildly alkaline and does not leach. All ingredients are and remain water-soluble, so no layers can build up. The formation of grey lime soap residues is safely avoided by special additives. These effects are not achieved by highly grease-dissolving cleaning agents and leaching soft soaps.

### Scope

Lithofin EASY-CARE is the ideal wiping care to maintain well-maintained floor coverings with little effort - both on large office spaces and in the household. Lithofin EASY-CARE is suitable for all waterproof substrates, but is especially used for surfaces where the maintenance components provide a better appearance:

All natural stones, e.g. polished marble, polished limestone, travertine, rough Solnhofen, slate, granite and much more. On ceramic coverings such as unglazed split slabs, glazed tiles, clinker, stoneware tiles, terracotta, clay tiles, etc. On cast concrete surfaces such as terrazzo, artificial stone, agglomerate marble, etc.

Due to its good properties, Lithofin EASY-CARE is also used for painted surfaces, plastics (kitchen) etc.

### Processing

Add one dash (approx. 20 ml) of Lithofin EASY-CARE per bucket (8 litres) of lukewarm water.

Mop the floor with a damp cloth. For first use, especially for absorbent pads, double the addition.

Do not rinse with clean water.

Yield: Rich concentrate and therefore very economical in consumption. For large areas that are cleaned daily with a scrubber drier, a monthly requirement of approx. 3 litre/100 m<sup>2</sup> can be expected.

### Storage

Cool and sealed, can be stored for up to approx. 5 years.

### Environmental protection

The surfactants are biodegradable in accordance with Regulation (EC) No. 648/2004 (detergents regulation).

Disposal: The container is made of environmentally friendly polyethylene (PE) and is recyclable. Rinsed containers can be disposed of via the recyclable material collection system (see note on label).

For information on labelling, transport and disposal, please refer to the safety data sheet.

### Packaging

- a) 1 litre bottle with child-proof cap (10 per box)
- b) 5 litre canister (2 per box)

Please note that the environmental and safety information applies to the (concentrated) product in delivery form. If dilution is appropriate for the application, the classification may change.

This information can and should only provide non-binding advice.

The use of the products must be adapted to the local conditions and the surfaces to be treated. If there is no experience and in all cases of doubt, the product should be tried out in an inconspicuous place beforehand. (GB2.26/9.25)
